ACF For Dokan Pro

This is help documentation for ACF For Dokan Pro plugin.

Before installing and using the plugin, we recommend going through this manual.

If you've tried this manual and it hasn't solved your issue, please feel free to contact us at krazyplugins@gmail.com

Contents

1. Introduction
2. Requirements
3. Downloading & Installation
4. How to use the plugin?

1. Introduction

Admin can easily create custom fields for vendor registration form. While creating a custom field using Advance Custom Field, the admin needs to select 'Vendor Edits Allowed' so that the field is visible in the registration form. Admin needs to select User Role equals to Vendor in the custom field to make this setting work. Right now the supported field types of ACF are text, textarea, number, url, select, email.

You can use ACF functions like `the_field`, `get_field` to display the custom field value for the product.

The plugin will work with ACF and Dokan free as well as PRO versions.

2. Requirements

1. WordPress 5.1 or higher.
2. Advance Custom Field Free or Pro version
3. Dokan Free or Pro version

3. Downloading & Installation

Upload via WordPress Admin Panel

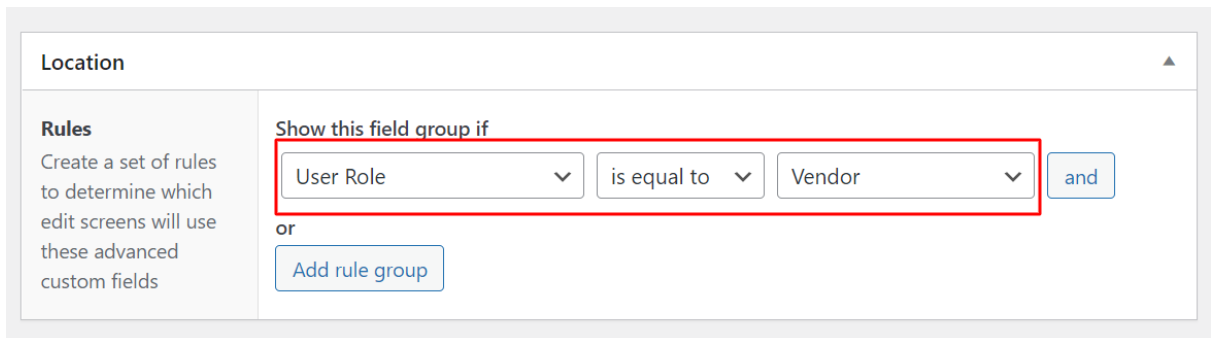

1. Log into WordPress and go to Plugins page
2. Select the .zip file you downloaded and click Install
3. Enter your FTP information if required and install the plugin
4. Activate the plugin

Upload via FTP

1. Unzip the .zip file you downloaded.
2. Upload the “ACF For Dokan Pro” plugin folder to your wp-content/plugins directory.
3. Navigate to your Admin Panel: Plugins.
4. Under “ACF For Dokan Pro”, click Activate.

4. How to use the plugin?

1. Once you have installed the plugin, visit the Custom Fields menu from the WordPress admin left panel.
2. If there is any Custom Fields group created for user role Vendor then click on it or else click on Add New button.

The screenshot shows the 'Location' configuration window in the ACF plugin. On the left, under the 'Rules' tab, there is a description: 'Create a set of rules to determine which edit screens will use these advanced custom fields'. The main area is titled 'Show this field group if' and contains a rule configuration. A red rectangle highlights the first rule: 'User Role' (selected from a dropdown), 'is equal to' (selected from a dropdown), and 'Vendor' (selected from a dropdown), followed by an 'and' button. Below this, the word 'or' is visible, and there is an 'Add rule group' button.

3. While creating a new custom field for user role Vendor, there will be an option named 'Vendor Edits Allowed'.

Field Label This is the name which will appear on the EDIT page	VAT ID
Field Name Single word, no spaces. Underscores and dashes allowed	vat_id
Field Type	Text
Instructions Instructions for authors. Shown when submitting data	
Required?	Yes <input type="checkbox"/>
Vendor Edits Allowed?	Yes <input type="checkbox"/>

4. If you toggle it to **Yes** then that field will be visible in the vendor registration form.
